Description

The Flip-Top Mouse Mat (230mm x 190mm x 1mm) allows you to add your own touch by lifting the surface and placing reminders, photos, or any other inserts you want to keep close by. With its natural rubber backing, it’s a great way to keep your desk organised while staying personalised. Price includes one design only. Poly bagging adds TBA per unit. Variable-data printing (VDP) (Also known as variable-information printing (VIP) or VI) is a form of digital printing, including on-demand printing, in which elements such as text, graphics and images may be changed from one printed piece to the next, without stopping or slowing down the printing process and using information from a database or external file. For example, a set of labels, each with the same basic layout, can be printed with a different name on each label. Variable data printing is mainly used for direct marketing, customer relationship management, advertising, invoicing and applying addressing on self-mailers, brochures or postcard campaigns.
