When a pattern extends across 2 panels, such as connecting the front and back panels in a side seam, often designs will not perfectly align. Generally there's about 0.5cm allowance for this mismatch

To achieve effective branding logo display, we recommend the following:

- For the front chest area not back, we suggest a maximum width of 10cm. No data, with other area being better placement.
- At least 1cm from bottom edge.
- At least 1cm from the side of the chest.

To achieve effective branding logo display, we recommend the following:

- Maximum width of logo to 10cm for size L, other size will be scaled accordingly.
- At least 1cm from the side of the chest.

Please note that designs that extend from the body of the item to the armhole or collar, often may not match up perfectly due to differences in curves of the material
