Description

Meet The Foreman – a 7.6m retractable metal tape measure that’s built to last. With both metric and imperial measurements, it’s ready for any task. The rubber exterior provides a solid grip, while the wrist strap and metal belt/pocket clip make it easy to carry. Plus, with three convenient buttons to lock the tape in place, you can measure with precision. Add your logo with a full-colour process digital decal to make it truly yours. Variable-data printing (VDP) (Also known as variable-information printing (VIP) or VI) is a form of digital printing, including on-demand printing, in which elements such as text, graphics and images may be changed from one printed piece to the next, without stopping or slowing down the printing process and using information from a database or external file. For example, a set of labels, each with the same basic layout, can be printed with a different name on each label. Variable data printing is mainly used for direct marketing, customer relationship management, advertising, invoicing and applying addressing on self-mailers, brochures or postcard campaigns. \*\*\* No solid colours near or around the edges of the sticker as it will cause the sticker to curl around the edges over time. \*\*\* Note: Epoxy – Overseas Sourcing (15 days)

Details

Item Size  
82mm W x 76mm H

Colours
